

Aftercare recommandation

The care and precautions for your tattoos are as important as the conditions under which it has been done.

Following care should be done 2 to 3 times per day during 3 weeks.

You are responsible for your tattoo Aftercare !

1 - Clean

(ph neutral soap - intimate wash soap ...)

2 - Rinse

(clear water to remove the soap)

3 - Dry

(without rubbing and using a single-use towel)

4 - Apply cream

(in thin layer)

5 - Only the first week, after the tattoo session, apply after your care, a non-woven compress on your tattoo.

CAUTION !

Do NOT scratch or touch your tattoo with dirty hands
Please also avoid baths, swimming pools, saunas ...

If you have any questions,
feel free to ask !

One month after your tattoo session, you can contact me in order to control your tattoo. We will have a look at it and decide if it needs touch-ups - In this case touch-ups are done for free.
